### PROFILE

Seeking a Software Quality Assurance position where I could learn and contribute my skills for better productivity of the organization. Performance-driven and dedicated Software Tester with a proven track record of success in meeting all assigned goals and targets.

### PROFESSIONAL EXPERIENCE

**Software QA Engineer, CMED Health Limited** 09.2022 – present

- Currently working with a QA team of 10 people for software testing, issue tracking & project coordination.
  - Estimate, Prioritize, Plan & Coordinate project & testing activities.
  - Reviewing designs and technical specifications and translating them into test cases to maximize test coverage.
  - Working with the software development & UI/UX team in an agile squad-based environment to thoroughly test and verify new features promptly before they are released.
  - Planning, Preparing & Executing Regression, Smoke, and Sanity.
  - Performance & API test cases with Swagger and Postman.
  - Managing all IT-related software of the organization.
- Example: Redmine management, Discord, DigiGO, and Mail server configuration.
- Essential server management, etc.
